

Juke That keyboard stickers

If you want to provide your party guests with an easy-to-use keyboard, you can buy a usual numeric keypad (numpad) and print these stickers on self-adhesive printer paper. Put the stickers on the numpad, including the black ones, as shown below. Then go into Configuration / Controls, and click and press each key to confirm the position.

You can also put stickers on the regular keyboard for extra DJ functions.

Guest keyboard stickers (numpad)

Red keys: Choose grouping
Yellow arrows: Select group
Green arrows: Select song
Plus: Wish song

DJ stickers (regular keyboard)
